- » USB-C Charge Cord included

CT8025 is packed in a 60x32x168mm card board box with Euro hanger hole.

A well lit Work Space is half the Job

Cat® Slim Pivoting LED Work Light

The CT8025 is a high powered LED work light, which securely magnetizes to ferrous surfaces. The slim design fits and lights up difficult to reach spots. The Light Head pivotes 180° and nests compactly protected so it can be placed in a pocket, tool-box, your glove compartment etc.

This compact light delivers 400 Lumens. A dimmer switch allows to adjust the light down to 40 lumens based on needs and for increasing run time.

It comes with a USB rechargeable battery with up to a 9 hour runtime when dimmed to lowest setting and a 4-hour runtime when set on high.

The charge indicator light provides a status on the battery level.
